1. Applicant's election with traverse of Group I, claims 1-18 and 20 in the reply filed on 6 November 2006 is acknowledged. The traversal is on the ground(s) that claim 19 includes the limitations of the apparatus claims from which claim 19 depends and that the search for both groups is coextensive. Applicant's arguments are persuasive accordingly the requirement for restriction has been withdrawn and all claims examined.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 19 is indefinite because both apparatus and method limitations are recited in the claim, therefore; it is not clearly understood whether claim 19 is directed to an apparatus or a method.

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 19 is rejected under 35 U.S.C. 101 because it includes both apparatus and method limitations, therefore; claim 19 embraces or overlaps two different statutory classes of invention and is directed to neither a "process" nor a "machine" as set forth in 35 USC 101 which is drafted so as to set forth the statutory classes of invention in the alternative only.

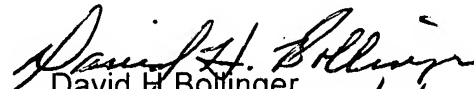

5. Claims 1 through 18 and 20 are allowed.
